

## PATIENT CARE EQUIPMENT CLEANING

ATTENTION TO DETAIL AND A SPOTLESS REPUTATION.

# THAT'S NEXCLEAN

## Why choose NEXClean?

### DEEP CLEANING & PREVENTATIVE MAINTENANCE

NEXClean is the industry leader in patient care equipment maintenance and deep cleaning. Whether preparing for an inspection or implementing a routine maintenance program, NEXClean will tailor our solutions to meet your expectations. Our process is built on mobility and features cutting edge technologies to remain efficient and cost effective.

### TRACKING AND REPORTING

NEXClean provides customers with a smart phone application to help track the inventory we have cleaned and get real time feedback on our services. Each piece of equipment receives a bar-code label and is scanned after it goes through the deep cleaning process. Upon completion of the service, customers receive a detailed report of the equipment that was cleaned. These records serve as a benchmark of your efforts to maintain the highest levels of cleanliness at your facility.

### ENVIRONMENTALLY CONSCIOUS

Electro-activated water and vapor steam are both water-based solutions that allow us to eliminate hazardous cleaning chemicals and drastically reduce water usage.

Patient care equipment is essential in the day to day operations and critical to the well-being of patients. Often times, this equipment is not properly cleaned, and that is where NEXClean's On-site Deep Cleaning Service comes in.

Contact NEXClean today for a free facility evaluation.
