Flagship Service

NEXClean was founded with this service. Our **Equipment Deep Cleaning Program** has been built on years of experience from large scale cleaning projects at some of the world's most renowned healthcare facilities.

3-Step Process

1. Deep clean with vapor steam and electro-activated water
2. Thorough wipe with hygienic microfiber towels
3. Quality assurance check before labeling and scanning

EQUIPMENT DEEP CLEANING

HEALTHCARE SERVICES

Facilities Serviced:

Hospitals, Long Term Acute Care Centers, Nursing Homes, Surgery Centers

Healthcare Services:

- Inspection Preparation
- Transportation Equipment Management
- Terminal Cleaning

Testimonial

“After their team left we felt that the environment was cleaner and aesthetically better than ever before.”

Perry Wein

Director of Perioperative Services
Lifespan Health (RI)

Track & Report

All serviced equipment is labeled and scanned into an asset tracking software. Clients then have access to a smartphone application that allows for real time feedback on all of their equipment.
